

CERTIFICATE OF ACCREDITATION

ANSI-ASQ National Accreditation Board

500 Montgomery Street, Suite 625, Alexandria, VA 22314, 877-344-3044

This is to certify that

INSPECT X Inc.
5575 Roscon Industrial Drive
Oldcastle, ON Canada N0R 1L0

has been assessed by ANAB
and meets the requirements of international standard

ISO/IEC 17025:2017

while demonstrating technical competence in the field of

DIMENSIONAL MEASUREMENT

Refer to the accompanying Scope of Accreditation for information regarding the types of calibrations to which this accreditation applies.

AT-1493
Certificate Number

ANAB Approval

Certificate Valid: 10/12/2018-12/28/2020
Version No. 008 Issued: 10/12/2018

This laboratory is accredited in accordance with the recognized International Standard ISO/IEC 17025:2017. This accreditation demonstrates technical competence for a defined scope and the operation of a laboratory quality management system (refer to joint ISO-ILAC-IAF Communiqué dated April 2017).

SCOPE OF ACCREDITATION TO ISO/IEC 17025:2017

INSPECT X Inc.

5575 Roscon Industrial Drive
Oldcastle, Ontario, Canada N0R 1L0
Barry Marontate

DIMENSIONAL MEASUREMENT

Valid to: December 28, 2020

Certificate Number: AT-1493

3 Dimensional

Table with 4 columns: Parameter/Equipment, Range, Expanded Uncertainty of Measurement (+/-) 2, Reference Standard, Method, and/or Equipment. Rows include 3D Length Measurement for CMM, OGP Vision System, and Romer Articulated Arm.

2 Dimensional

Table with 4 columns: Parameter/Equipment, Range, Expanded Uncertainty of Measurement (+/-) 2, Reference Standard, Method, and/or Equipment. Row includes 2D Length Measurement for OGP Vision System.

Calibration and Measurement Capability (CMC) is expressed in terms of the measurement parameter, measurement range, expanded uncertainty of measurement and reference standard, method, and/or equipment. The expanded uncertainty of measurement is expressed as the standard uncertainty of the measurement multiplied by a coverage factor of 2 (k=2), corresponding to a confidence level of approximately 95%.

Notes:

- 1. On-site calibration service is available for this parameter, since on-site conditions are typically more variable than those in the laboratory, larger measurement uncertainties are expected on-site than what is reported on the accredited scope.
2. L = Length in meters.
3. This scope is formatted as part of a single document including Certificate of Accreditation No. AT-1493.

Signature of Barry Marontate
Vice President
